KEY PROJECTS

AWS to Hetzner Cloud Migration — Directed cloud migration for Brain Mentors ecosystem; designed Docker Compose hosting, Nginx routing, SSL management, and backup planning to improve scalability and reduce infrastructure costs.

Enterprise DevOps & Deployment Automation — Designed deployment automation frameworks using GitHub Actions, Jenkins, and Docker; standardized build, release, rollback, and deployment workflows across environments.

Enterprise Code Quality & Engineering Governance — Established SonarQube-based quality gates, static code analysis, and CI/CD integration improving code maintainability, release confidence, and software quality.

Enterprise Coding Assessment Platform — Architected secure multi-language code execution and automated evaluation using Judge0, Docker sandboxing, and resource isolation strategies.

Enterprise Learning & Assessment Platform — Designed and evolved a large-scale platform supporting online exams, learner management, analytics, and progress tracking; led modernization from Java EE to full-stack technologies.
